

Vacancy

CLPe Solutions Limited
Distributed Energy Department
Solar PV Branch
Project Manager (Solar PV)
[Ref. CLPeS-DE-SolarPV-PM]

CLP was founded in Hong Kong in 1901, at a time when electricity was still a novelty worldwide. Today we are an investor and operator in the energy sector of the Asia-Pacific region. In Hong Kong, we operate a vertically-integrated electricity supply business providing a highly reliable supply of electricity to 80% of the city's population. Outside Hong Kong, CLP holds investment in the energy sector in Mainland China, India, Southeast Asia, Taiwan and Australia. Its diversified portfolio of generating assets uses a wide range of fuels including coal, gas, nuclear and renewable sources.

CLPe Solutions Limited (formerly CLP Engineering Limited), incorporated in Hong Kong in 1985, is a wholly-owned subsidiary of CLP Holdings Limited with extensive experience in providing total energy solution. The company undertakes a variety of services including energy management solutions, distributed energy as well as power engineering, infrastructure and facilities management.

We are looking for a high caliber professional to join our Distributed Energy Department as a Project Manager (Solar PV). Key responsibilities include:

- Lead the solar project implementation, carrying out solar PV systems construction and operation & maintenance and to ensure the PV systems are built and operated within the set technical and performance standard.
- For the construction - plan and manage the construction process and lead the team members to carry out solar PV systems construction in according to the schedule, budget, and in-house and regulatory requirements; and with following duties:
 - Responsible for effective project management of solar PV projects, including ensuring the project schedule on track and within the budget
 - Coordinate with clients, suppliers, contractors or related parties to plan, schedule and set up procedures to meet projects' requirements and regulations
 - Coordinate with suppliers / subcontractors and solve both technical and practical problems independently
 - Supervise and monitor the performance of subcontractors
 - Conduct project testing and commissioning
 - Liaison with CLPP for the FiT meter installation
 - Prepare construction management report
- For the operation and maintenance - Plan the maintenance schedule and lead the team members to carry out preventive and corrective maintenance on-site including inspections, repair, testing and commissioning of solar PV systems according to the in-house and regulatory requirements
- Work with safety officers/ supervisors to formulate the method statement, risk assessments and safety work procedure for the projects under construction and operation. Implement and monitor the Safety, Health, Environment and Quality (SHEQ) system to ensure the required standards are achieved
- Prepare tender documents and work with procurement team for tendering.

- Conduct technical due diligence occasionally
- Lead the team to perform data analysis of solar PV systems via online management platform.
- Regularly report on project progress to the management
- Work closely with Business Development Team to handle tender bid activities and related enquires for solar PV projects
- Support Distributed Energy Business Line to carry other power-related business opportunities

Requirements:

- A recognized university degree in Building Services Engineering, Electrical Engineering, Mechanical Engineering, Electronic Engineering or relevant engineering disciplines with a minimum of 8 years' working experience in project management
- Possession of Construction Industry Safety Card
- Possession of professional corporate membership in Engineering Institution would be an advantage
- Good construction project management skills and experience in E&M projects
- Experience in construction, operation and maintenance, and energy yield assessment and performance analysis of solar PV systems will be an added advantage
- Excellent communications and presentation skills and experiences to deliver presentation and communicate with clients through different communication channels in both verbal and written format
- Good knowledge on safety, health, environmental and quality management
- Good command of spoken and written English and Chinese, ability in Mandarin communication would be a plus
- Customer-oriented, self-motivated, a good team player, able to work independently and meet tight deadlines
- Candidate with Registered Electrical Worker B and a valid driving license (1 or 2) are preferable
- Candidates with less experience will be considered for lower position

Please apply by sending email to clpehr@clp.com.hk giving a detailed C.V., including academic qualification, career history, current and expected salary, major achievements and personal attributes on or before **22 January 2021**.

Applicants not invited for interview within 6 weeks from the closing date may assume their applications unsuccessful.

Information provided will be for recruitment purpose within the CLP Group and only short-listed candidates will be contacted. We comply with all applicable laws and regulations of HKSAR in handling applications.
