

Vacancy

CLP Power Hong Kong Limited
Information Technology Group /
Distribution Network Operations Optimisation
Analyst – Platform / Integration (IT Infrastructure) (3-Year Contract)
[Ref. CLPP-ITG-DNOO-A-PI-ITF]

CLP was founded in Hong Kong in 1901, at a time when electricity was still a novelty worldwide. Today we power millions of homes and businesses across the Asia Pacific regions. In Hong Kong, we operate a vertically-integrated electricity supply business providing a highly-reliable supply of electricity to 80% of the city's population. Outside Hong Kong, we invest in the energy sector in Mainland China, India, Southeast Asia, Taiwan and Australia. Our business includes power generation, transmission and distribution, and electricity and gas retail activities. Our goal is to meet Asia-Pacific's energy challenge in a sustainable manner from one generation to the next.

CLP is an Equal Opportunity Employer and is committed to providing a working environment free from discrimination or harassment. All applicants will be considered for employment on an equal basis regardless of gender, physical or mental state, race, nationality, religion, age, family status or sexual orientation.

CLP is also a certified Fair Wage Employer in recognition of the Company's exemplary wage policies and practices.

CLP has embarked on a journey to becoming a "Utility of the Future" which is customer-centric, agile and digitally-enabled. The company is launching strategic transformation initiatives across the business in which next generation technologies will play a pivotal role.

We are looking for passionate IT professionals to join the project teams. Reporting to Team Lead – Platform/Integration, the appointee will undertake the following major duties:

Key Responsibilities:

- Designing, building, and maintaining a complex infrastructure environment.
- Responsible for managing the design of IT infrastructure for new business initiatives, technology refresh and adoption of new technology
- Act as escalation point for infrastructure related issues on the platform
- Work with stakeholders and other IT teams on end-to-end projects
- Deliver end to end technical infrastructure designs, ensuring non-functional requirements are realized and validated

Requirements:

- A recognized university degree or diploma in Computer Science, Information Technology or equivalent
- At least 8 years' solid IT experience in large-scale system administration and operations
- Deep domain expertise of infrastructure design and solutions (i.e. Windows and Linux, Security, Storage, Networking, containers, Infra as a code, etc.)

- Experience of enterprise infrastructure, AD, Group Policy, Office 365, Identity and Access Management, SQL, Kubernetes, cloud platform such as Azure, Ali Cloud, AWS.
- Drive IT infrastructure projects (Cloud migration, database optimisation, enterprise data backup solution, etc.)
- Self-initiated, open minded, willing to learn, explore and implement new and emerging technologies
- Sound communication, presentation and influencing skills to work with business, IT colleagues, and external; Strong analytic skills to understand and resolve complex problems
- Great sense of ownership and servicing mindset
