

Vacancy

CLP Power Hong Kong Limited
Generation Business Group
Black Point/Penny's Bay Power Stations
Engineer IIs (in either Operation or Maintenance)
[Ref: CLPP-GBG-BPPS/PBPS-EIIs]

Founded in 1901 as China Light and Power Company Limited in Hong Kong, CLP Group has grown from a Hong Kong-based power utility into a leading investor and operator in the Asia Pacific Region's electricity market. Its portfolio comprises over 60 generation assets of gas, coal, nuclear and renewable energy, distribution and transmission assets and retail operations. The CLP Group is owned by CLP Holdings, a company listed on the Stock Exchange of Hong Kong.

Applications are invited for the above vacancy in Black Point/Penny's Bay Power Stations (BPPS/PBPS). The appointees will be responsible for the Power Plant operation or maintenance including BPPS/PBPS Generation Units, Auxiliary Systems and Gas Receiving Facilities, and to ensure that the electricity generation processes are operated and maintained in a safe, reliable, and efficient manner. The appointees will also be responsible for commissioning works of the LNG GRS project and subsequent O&M works. Major duties include: -

Operation

- Support LNG GRS project, including interface with project team and perform commissioning work.
- Execute shut-down and start-up of gas and plant facilities including switching, isolation and purging.
- Perform gas processing plant and main plant operation and frontline maintenance work in a safe and efficient manner.
- Act as an Authorized Person or a Senior Authorized Person to carry out gas purging, electrical and mechanical isolation and issuance of safety documents.
- Supervise, direct, and co-ordinate multi-disciplinary work teams and contractors' workforce to carry out overhaul jobs and other maintenance activities to ensure consistent work quality and job safety are maintained at all times.
- Take lead in innovation initiatives and continuous improvement projects assigned by supervisor.

Maintenance

- Support LNG GRS project, including interface with project team and perform commissioning work.
- Ensure all the maintenance activities under their responsible areas are carried out in a timely manner and meeting the requirements for safety, availability, reliability and efficiency.
- Review engineering documentation, draft technical and commercial contract specification, and write maintenance procedures.

- Carry out effective maintenance of plant and equipment including fault diagnosis and emergency repair work.
- Supervise, direct, and co-ordinate multi-disciplinary work teams and contractors' workforce to carry out overhaul jobs and other maintenance activities to ensure consistent work quality and job safety are maintained at all times.
- Assist in formulating medium-term and long-term investment strategies.

Requirements:

- A recognized university degree or equivalent in an engineering discipline plus at least 3 years relevant working experience.
- General knowledge of power plant engineering.
- Solid experience in engineering, operations, maintenance, or installation of heavy electrical/mechanical/control & instrumentation equipment.
- Successful candidates will be required to work on shift when he/she is assigned in operation branch;
- Familiar with Safety, Health and Environment related regulations and ordinances.
- A good team player with strong analytical skill and self-initiative.
- Proficient in both written and spoken English and Chinese (both Cantonese and Mandarin).
- Previous exposures to power plant environment and related contracts development/management will be an advantage.
