

Vacancy

CLP Power Hong Kong Limited
Generation Business Group
Castle Peak Power Station / Maintenance
Engineer IIs
[Ref.: CLPP-GBG-CPPS-M-EIIs]

CLP was founded in Hong Kong in 1901, at a time when electricity was still a novelty worldwide. Today we power millions of homes and businesses across the Asia Pacific regions. In Hong Kong, we operate a vertically-integrated electricity supply business providing a highly-reliable supply of electricity to 80% of the city's population. Outside Hong Kong, we invest in the energy sector in Mainland China, India, Southeast Asia, Taiwan and Australia. Our business includes power generation, transmission and distribution, and electricity and gas retail activities. Our goal is to meet Asia-Pacific's energy challenge in a sustainable manner from one generation to the next.

CLP is an Equal Opportunity Employer and is committed to providing a working environment free from discrimination or harassment. All applicants will be considered for employment on an equal basis regardless of gender, physical or mental state, race, nationality, religion, age, family status or sexual orientation.

CLP is also a certified Fair Wage Employer in recognition of the Company's exemplary wage policies and practices.

Applications are invited for the above position in the Castle Peak Power Station. Reporting to the Engineer I (Boiler & Fuel/ Turbine team) of the Maintenance Branch, the appointee will be responsible for the following duties:-

- Ensure maintenance work activities are carried out in a safe manner and meet the required engineering standard and codes of practice.
- Monitor assigned activities to ensure they are conducted according to schedule, budget, design and relevant codes of practice.
- Analyse and diagnose equipment fault and defects. Troubleshoot complex problems and provide technical advices.
- Make the recommendations and changes to maintenance practices to improve work efficiency, safety standards, cost effectiveness, and performance improvement for power plant systems.
- Review engineering documentation, compile and develop maintenance procedures and draft technical and commercial contract specification.
- Utilize computer-based maintenance systems and develop cost effective maintenance strategies.
- Manage contractors and suppliers' work performance in accordance with the agreed schedule, budget, design and relevant codes of practice.
- Assist supervisors to develop and implement life cycle maintenance plan for the plant assets.
- Support station operation through participation in Maintenance-Operator.
- Carry out ad-hoc operational activities under assignment.

Requirements:

- A recognized university degree in electrical or equivalent in engineering plus 3 years relevant working experience; or Higher Diploma/Certificate in electrical engineering plus 5 years relevant working experience.
- Familiarity with CLP Power Safety Rules, engineering standards, codes of practice, and the relevant statutory regulations.
- Familiarity with New Engineering Contract model, target cost and KPI setup, compensation event mechanism and the relevant regulations.
- Proficiency in both spoken and written Chinese and English.
- A good team player, self-initiative with strong analytical skills.
- Familiar with CLP Power operations safety policies & procedures, SHE policies, standards and requirements
- Strong sense of responsibility with good interpersonal skill.

Please apply by sending email to hrgbg@clp.com.hk giving a detailed C.V., including career history, major achievements and personal attributes on or before **3 August 2021**.
