

Vacancy

CLP Power Hong Kong Limited
Power Systems Business Group
East & West Region / Operations Branch
Engineer II (2-year Contract)
[Ref: CLPP-PSBG-WER-OB-EII]

CLP was founded in Hong Kong in 1901, at a time when electricity was still a novelty worldwide. Today we power millions of homes and businesses across the Asia Pacific regions. In Hong Kong, we operate a vertically-integrated electricity supply business providing a highly-reliable supply of electricity to 80% of the city's population. Outside Hong Kong, we invest in the energy sector in Mainland China, India, Southeast Asia, Taiwan and Australia. Our business includes power generation, transmission and distribution, and electricity and gas retail activities. Our goal is to meet Asia-Pacific's energy challenge in a sustainable manner from one generation to the next.

CLP is an Equal Opportunity Employer and is committed to providing a working environment free from discrimination or harassment. All applicants will be considered for employment on an equal basis regardless of gender, physical or mental state, race, nationality, religion, age, family status or sexual orientation.

CLP is also a certified Fair Wage Employer in recognition of the Company's exemplary wage policies and practices.

Applications are invited for the above vacancy in Operations Branch of East & West Region. Reporting to the Engineer I, the successful candidate will be responsible for the following duties:-

- Plan and control projects activities, including materials and resources utilization
- Assist in formulating long and short-term outage plans and the associated work plans to meet the business objectives
- Liaise and co-ordinate with various departments of project works and plan, schedule, set up proper procedures and precautions to meet the Company's requirements and Safety Rules
- Ensure adequate and justifiable budgets being prepared for project installation and other activities, and control the related expenditure
- Review work and related documents including safety aspect, to ensure their compliance with company's policies and procedures and to provide recommendations for continuous improvement and cost effectiveness
- Carry out fault / defects investigation, and execute diagnosis, analysis and repairs works
- Evaluate and recommend suppliers and services contractors which can meet technical specifications and engineering standards to achieve construction and operational targets. Devise and implement systems to manage the performance of contractors
- Supervise work teams and services contractors in carrying out pre-commissioning checks/ commissioning tests on distribution equipment and in delivery of operational tasks including but not limited to trench work with cable laying, outage schedule and preparation, and distribution plant O&M works
- Perform standby duty after normal office hours and during adverse weather condition / typhoon period, and carry out emergency repairs / shift duties as and when required

Requirements:

- A recognized university degree in Electrical Engineering or equivalent
- At least three years' relevant engineering experience in electricity supply industry. Preference will be given to those with experience in power utilities or region operations
- Possession of 11kV Authorized Person qualification is preferred
- Possession of a valid Driving License (class 1, 2) is preferred
- Familiar with CLP Power Safety Rules, engineering standards and codes of practice / management systems, occupational health and environment related legislations
- Be mindful and has good safety awareness and track record
- Analytical and able to work under pressure and tight schedule
- Strong sense of responsibility with good interpersonal and communication skills
- Ability to work independently and communicate technical concepts in English and Chinese, verbally and written

Candidates with less qualification and/or experience but demonstrate good potential for further development will be considered for a position at lower grade.
