CLP Power Extends Electric Vehicle Charging Network as Popularity of Green Motoring Accelerates

CLP Power Hong Kong Limited (CLP Power) today (24 November) announced it will extend free charging for Electric Vehicles (EVs) at its network of 45 charging stations until the end of 2017. This is an effort to support the Government's mission to make Hong Kong a greener, smarter city.

CLP Power has extended its network of multi-standard quick charging stations, making them available in districts across the city to improve coverage and convenience for EV users. Quick charging stations are now available at driving intervals averaging 10 km throughout Kowloon and the New Territories, which is a notable milestone in our journey to encourage green motoring.

Over the next two years, EV drivers will be better served as CLP Power adds 13 more multi-standard quick chargers to its network of stations. The new chargers are suitable for most EVs in Hong Kong and support multi-standard quick charging including the Japanese quick charging standard (CHAdeMO) and the two European quick charging standards (CCS and IEC Type 2 AC 3 Phase). Depending on the vehicle type, the chargers enable compatible EVs to be charged up to 80% battery capacity within 30 minutes, providing enough power for a journey of approximately 100 km.

To cater to the expanding EV market, the Government has also approved CLP Power to upgrade all its existing standard chargers to the semi-quick standard which facilitates improved, faster charging.

CLP Power has pioneered the introduction of charging stations across its power supply network since 2009. Drivers can now charge their EVs at a total of 145 charging points covering every major district in Kowloon, the New Territories and Lantau Island. Customers can also download a "CLP Hong Kong App" to locate the nearest EV charging station. The smartphone app provides users with a detailed map and the suggested route.

Appendix: Full list of CLP Power's EV charging stations

About CLP Power Hong Kong Limited

CLP Power Hong Kong Limited ("CLP Power") is the Hong Kong utility subsidiary wholly owned by CLP Holdings Limited, a company listed on the Hong Kong Stock Exchange and one of the largest investor-owned power businesses in Asia. CLP Power operates a vertically integrated electricity supply business in Hong Kong, and provides a highly reliable supply of electricity and excellent customer services to 6 million people in its supply area.
