20 July 2018

CLP and TUS-Clean Energy Form Joint Venture on New Energy and Smart City Technologies

CLP Holdings Limited (“CLP”) and TUS-Holdings Co., Ltd. (“TUS”) are pleased to announce the formation of a joint venture between their respective subsidiaries CLP Smart Energy (China) Limited and Beijing TUS-Clean Energy Co., Ltd. The new partnership aims to develop and deploy new energy and smart city technologies amid growing demand for digitalised energy infrastructure and services in Mainland China.

The Greater Bay Area will be a key focus for the joint venture, TUS-CLP Smart Energy Technology Co., Ltd. (“TUS-CLP JV”). Dr Bernard Chan Pak-li, Under Secretary for Commerce and Economic Development of the HKSAR Government, attended a ceremony on 18 July to celebrate the formation of TUS-CLP JV, which marks a new milestone for the cooperation between the two companies.

Mr Richard Lancaster, Chief Executive Officer of CLP, said, “China plans to turn the Greater Bay Area into a global hub of innovation, finance, shipping and trade. Obviously the area will become a connected network of smart cities enabled by digitalisation. To achieve this we will need clean, reliable and efficient energy infrastructure supported by innovative customer services. With our strengths combined, TUS and CLP are well positioned to capture the business opportunities that emerge.”

Mr Wang Jiwu, Chairman of TUS, said, “We are working closely with CLP in response to China’s electricity sector reform as well as the effective use and sustainable development of clean energy. The partnership will foster cooperation between Mainland China and Hong Kong businesses on energy, technology innovation and industrial upgrade. TUS and CLP will also facilitate the participation of our financial, technological and professional services in the energy revolution and industrial development currently underway in Mainland China and globally. With the support of financing and capital in technology, we can play an active part in nurturing technology development. Our goal is to use technology to promote industrial transition and economic growth. We also aim to contribute to the Belt and Road Initiative and the development of smart energy and smart city in the Greater Bay Area.”

Mr Karl Ma, Vice Chairman of TUS, said, “TUS Holdings is blessed with its technological background and expertise in information technology. Our activities span different sectors and across regions. CLP is a market-oriented and international company with its unique approaches to investments and operations. Our cooperation will focus on energy first and the plan going forward is to apply emerging technologies such as Artificial Intelligence, Blockchain and Internet-of-Things in the
energy sector. We want to establish a new industry and business model that can take full advantage of the development of the Greater Bay Area and the Belt and Road Initiative, the main thrust of which is built upon the innovation, distribution and sharing of technology. We hope that the new platform between TUS and CLP can play an active role on these aspects.”

Aside from its significance for the energy industry, the partnership between CLP and TUS is a showcase for close collaboration between companies in Hong Kong and Mainland China that will help create a smart and sustainable environment for the wider community.

About TUS-Holdings

TUS-Holdings Co., Ltd. is a large integrated enterprise established in reliance on Tsinghua University. It is the controlling shareholder or shareholder of over 800 listed and non-listed enterprises, with total assets exceeding RMB200 billion.
