CLP Power Extends Free Charging Service to Encourage Green Motoring

CLP Power Hong Kong Limited ("CLP Power") has promoted green motoring in Hong Kong in recent years by expanding its electric vehicle (EV) charging service, providing EV drivers with a convenient and reliable territory-wide network. Today (14 December), CLP Power announced the free service at its EV charging stations will be extended until the end of 2019.

In response to growing demand, the EV charging network has been extended to 54 stations with a total of 161 charging points in Kowloon, the New Territories, and Lantau. CLP Power has also completed an upgrade of all its standard chargers to semi-quick standard so that motorists can enjoy a faster and improved service.

EV drivers can download the CLP mobile app or check the CLP Power website for the location of every EV charging station and to receive the latest updates on the service.

CLP Power will conduct regular reviews on the use and arrangements of its EV charging network to keep pace with the changing market needs.
