

24 June 2022

Update on CLP Cable Bridge Fire Incident in Yuen Long on 21 June 2022

After tremendous effort by CLP Power's engineering teams in laying the three replacement 132kV high-voltage cables, the first cable was successfully energised at 3am today (24 June). This new cable is able to reinforce power supply capability and enhance the reliability of the power system in the region. For the remaining two cables, we target to complete the cable laying works and have them energised on or before next Tuesday (28 June).

We apologise again for the inconvenience caused to the affected customers and would like to express our appreciation for their understanding. We will continue to closely monitor the electricity supply in the region and arrange redeployment if needed. Customers can call our dedicated hotline 2728 8333 or contact us through the eForm on our website for enquiry.
