## **Legislators' Visit to Black Point Power Station Enhances Understanding of CLP Power's Multi-pronged Approach to Decarbonisation**

CLP Power Hong Kong Limited (CLP Power) received 23 Members of the Legislative Council at the Black Point Power Station in Tuen Mun on 15 October. The visit aims to strengthen communication and enhance the legislators' understanding of CLP Power's multi-pronged approach to decarbonisation.

Accompanied by CLP Power Managing Director Mr T K Chiang and Chief Corporate Development Officer Ms Quince Chong, the legislators were introduced to CLP Power's decarbonisation strategy to drive energy transition and reduce carbon emissions through supply and demand side management. The company's decarbonisation strategy includes progressively phasing out coal-fired generation, diversifying the fuel mix, promoting the development of local renewable energy, exploring the use of new technologies such as green hydrogen, promoting electrification, and enhancing regional cooperation to introduce new sources of zero-carbon energy to support the Government's target to achieve carbon neutrality before 2050 was also shared.

The legislators then toured CLP Power's new gas-fired generation unit D1 which commenced operation in mid-2020, and another new gas-fired generation unit D2 which is under construction. The new D1 unit substantially increased the proportion of natural gas in CLP Power's fuel mix to around 50% and further reduced the carbon intensity of electricity generation.

### **About CLP Power Hong Kong Limited**

CLP Power Hong Kong Limited ("CLP Power") is the Hong Kong utility subsidiary wholly owned by CLP Holdings Limited, a company listed on the Hong Kong Stock Exchange and one of the largest investor-owned power businesses in Asia. CLP Power operates a vertically integrated electricity supply business in Hong Kong, and provides a highly reliable supply of electricity and excellent customer services to more than six million people in its supply area.
