26 October 2022

CLP Smart Energy Award Receives 600 Entries and Showcases Innovative Energy and Carbon Reduction Initiatives

CLP Power Hong Kong Limited (CLP Power) today (26 October) hosted a presentation ceremony for the 2022 **Smart Energy Award** programme, which attracted entries from around 600 corporate and Government bodies, small and medium-sized enterprises (SMEs), non-governmental organisations (NGOs), and educational institutions. The programme recognises businesses and organisations for their outstanding performance in applying innovative technologies and smart management to save energy and reduce carbon emissions.

The awards were presented in four categories: Carbon Management, Innovation, Energy Management, and Sustainable Vision. Each category comprises one division for corporate and Government bodies and another for Catering and SMEs, NGOs, and educational institutions. Judges selected a total of 63 winners (please see appendix for full awards list).

The Kowloon Motor Bus Co. (1993) Ltd. (KMB) won the **Carbon Management Grand Award** in the corporate and Government body division after successfully introducing innovative technologies and energy-saving initiatives to enhance its operational efficiency and reduce emissions. This year KMB introduced a fleet of new generation single-decker electric buses, and installed solar panels on the roofs of its non-electric fleet, which provide power for ventilation and air conditioning systems when the engines of the buses are turned off. The company will complete the installation of a total of 30,000 solar panels in depots, terminals, and bus shelters by 2023, reducing estimated carbon emissions by more than 4,800 tonnes a year.

A restaurant under LH Group, #HAP Taiwanese Hotpot, won the **Innovation Excellence Award** for introducing an Internet of Things-based intelligent control hot pot induction cooker system, which controls the temperature of cookers and monitors energy consumption data to optimise efficiency. The system allows employees to regulate the temperature of cookers using an App, saving them time and effort, and is the first of its kind in Hong Kong.

Hong Kong pledges to become carbon neutral by 2050 to counter climate change. CLP Power Managing Director Mr T K Chiang said, "We are committed to encouraging our customers to conduct their business in a greener way and participate in Hong Kong's low-carbon transformation. Reducing carbon emissions is a primary focus of CLP Power. We will continue to promote energy efficiency to our customers, applying innovative technologies and launching a wide range of initiatives as we work hand in hand with them to transform Hong Kong into a low-carbon smart city."

Chairman of the Energy Advisory Committee Mr Jimmy Kwok, who was the officiating guest at the ceremony, said: "More and more corporates and SMEs pay attention to the impact of climate change and have incorporated carbon reduction into their strategies in recent years. The green transformation of businesses is a win-win situation, reducing carbon emissions for everyone while lowering operating expenses by improving energy efficiency."

The **CLP Smart Energy Award** programme is widely recognised in the community, its judging panel is a broad cross-section of officials and experts, comprising members from Government, chambers, green groups, and professional bodies. To find out more about the energy-saving solutions adopted by the winners of the **CLP Smart Energy Award** programme, please visit www.clp.com.hk/SEaward.

About CLP Power Hong Kong Limited

CLP Power Hong Kong Limited (CLP Power) is the Hong Kong utility subsidiary wholly owned by CLP Holdings Limited, a company listed on the Hong Kong Stock Exchange and one of the largest investor-owned power businesses in Asia. CLP Power operates a vertically integrated electricity supply business in Hong Kong, and provides a highly reliable supply of electricity and excellent customer services to more than six million people in its supply area.
