CLPe Technician Trainee Wins Prestigious Award in Labour Department Youth Employment and Training Programme

Accolade for CLPe technician trainee Thomas Lam was awarded with the **Most Improved Trainees Award** in the Labour Department's Youth Employment and Training Programme (YETP) 2024. Thomas won the award for his outstanding work performance and personal growth during his training with CLPe, which was also commended as a **Caring Employer** at the awards for the care and guidance it provides to trainees.

Thomas began studying for a Diploma of Vocational Education (Mechanical Engineering) at the Vocational Training Council (VTC) in 2022. Last year, he joined the CLPe Technician Trainee programme and become a member of CLPe's Electrical and Mechanical Engineering team, assisting on the maintenance of power generation facilities. He also joined the Project for Tradesman Trainees scheme jointly organised by the YETP and the VTC, and was selected by the Labour Department as one of the 10 Most Improved Trainees for his diligence and eagerness to learn, as well as his work performance and commitment.

During his training, Thomas learned the technique of maintaining power generation facilities and the importance of teamwork, deepening his interest in electrical engineering. He hopes to further improve his skills and career prospects through continuing education. "I am very grateful to CLPe for giving me the opportunity to learn about electrical engineering," he said. "The mentors and team members have coached me and shared their knowledge and life experience, which has made me more confident and proactive."

CLPe Managing Director Mr Ringo Ng was delighted with the recognition of the company's efforts in developing talents. "Demand for energy management services continues to grow as more and more companies recognise that energy saving and carbon reduction enhance their market competitiveness," he stated. "CLPe actively seeks to attract talent to meet business development needs, providing recruits with comprehensive on-the-job training and subsidising their continued education. This

allows us to build a professional team that offers clients comprehensive, one-stop energy solutions."

CLPe provides power and infrastructure solutions to optimise customers' energy management in Hong Kong and other cities in the Greater Bay Area. CLPe greatly values talent development and its Technician Trainee programme offers young people a gateway to the energy management industry. Trainees gain technical knowledge related to electrical engineering and receive on-the-job training while gaining work experience in different departments, laying a solid foundation for their long-term career development.

About CLPe

CLPe is a wholly-owned subsidiary of CLP Holdings Limited. The company provides a one-stop shop for customers, integrating products and services into value-added solution packages to support low-carbon and sustainable business development. As a trusted partner for energy and infrastructure solutions in Hong Kong and Mainland China, CLPe delivers urban and industrial energy infrastructure in power, heating, cooling, e-transportation, and data centres to cities, comprehensive building energy management in cooling, solar energy, energy storage, EV charging, electrical and mechanical services, and smart solutions to commercial and industrial customers. For details, please visit www.clpesolutions.com.
