Daya Bay Nuclear Power Station Wins the HKIE 50th Anniversary Legacy Award

Daya Bay Nuclear Power Station has been presented with the **Legacy Award (Industrial)** and the **Grand Award (Industrial, 1990s)** in the **Hong Kong Institution of Engineers (HKIE) 50th Anniversary Legacy Award**. The tributes recognise the outstanding contribution of the power station – a joint venture between CLP Group (CLP) and China General Nuclear Power Corporation (CGN) – to Hong Kong over the past three decades.

The HKIE 50th Anniversary Legacy Award features awards in three categories – innovation, industry and infrastructure, celebrating outstanding engineering projects, groundbreaking technologies, and transformative initiatives over the past half century. Among more than 100 nominated projects, Daya Bay Nuclear Power Station was selected as one of the top five in the industrial category, winning the Grand Award (Industrial, 1990s), and received the Award’s highest honour – the Legacy Award (Industrial) – after assessment by a panel of judges and a public vote.

Daya Bay Nuclear Power Station has been providing Hong Kong with non-carbon, safe and stable nuclear power since 1994. Over the past 30 years, it has supplied more than 320 billion kWh of non-carbon electricity to Hong Kong, meeting approximately a quarter of the city’s electricity needs and playing a crucial role in Hong Kong’s transition to carbon neutrality.

CLP Power Managing Director Joseph Law said, “Daya Bay Nuclear Power Station is an achievement made possible by the foresight and determination of the then state leader Deng Xiaoping and CLP’s then Chairman Lord Kadoorie. As one of the earliest and largest joint ventures since the reform and opening up of the Mainland, Daya Bay has significantly contributed to Hong Kong’s economic and social development while nurturing talents in the nuclear industry.”

He added, “my sincere thanks go to the CLP and CGN teams for their efforts in ensuring the excellent safety and operational performance of Daya Bay. CLP will continue to support the

development of non-carbon energy, including nuclear and renewable energy, to achieve Hong Kong's decarbonisation goals.”

About CLP Group

The CLP Group is one of the largest investor-owned power businesses in Asia Pacific with investments in Hong Kong, the Chinese Mainland, Australia, India, Taiwan Region and Thailand. Hong Kong-listed CLP Holdings Limited is the holding company for the CLP Group, whose business spans every major segment of the electricity value chain ranging from power generation, transmission and distribution to retail and smart energy services.
