**CLP Power Tai Po System Control Centre
Marks 40 Years of Service Excellence
Driving Innovation to Safeguard Reliable Power Supply**

To mark the 40th anniversary of the System Control Centre of CLP Power Hong Kong Limited (CLP Power) located at Strafford House in Tai Po Kau, CLP Power management, staff, and retirees gathered today (19 January) to revisit the Centre's development over the past four decades, witness the optimisation of power supply network operations, and look ahead to a new chapter of grid digitalisation.

The Centre is the core hub of the power system, has been operating round the clock since its commissioning in 1985 in monitoring the power system and equipment across CLP Power's supply area, thereby ensuring a 99.999% world-class reliability in supporting the city's continued growth. From its early backbone network and main substations, the power grid has evolved into a robust and interconnected network, delivering stable and reliable electricity to every household and business. Over the years, system control engineers have precisely planned daily generation to meet changing electricity demand. They have remained steadfast during challenges such as extreme weather and the pandemic to ensure safe, efficient, and reliable power supply.

CLP Power Managing Director Mr Joseph Law said, "Hong Kong is at a momentous stage of energy transition and digital transformation. We will continue to introduce innovative technologies to enhance grid flexibility. CLP Power has recently implemented an Advanced Distribution Management System (ADMS) to integrate various existing grid monitoring platforms, strengthen data interoperability, and enable engineering staff to centrally manage data on distribution lines and substations, further improving decision-making efficiency and grid management."

The Centre has revamped its Exhibition Gallery and Viewing Gallery, installing high-definition interactive displays to give visitors deeper insights into CLP Power's business operations in the face of digitalisation. CLP Power will continue to drive innovation through adopting artificial intelligence to further enhance electricity services.

About CLP Power Hong Kong Limited

CLP Power Hong Kong Limited (CLP Power) is the Hong Kong utility subsidiary wholly owned by CLP Holdings Limited, a company listed on the Hong Kong Stock Exchange and one of the largest investor-owned power businesses in Asia. CLP Power operates a vertically integrated electricity supply business in Hong Kong, and provides a highly reliable supply of electricity and excellent customer services to more than six million people in its supply area.
