Asset Performance Statistics

Penny's Bay

- Diesel-fired power station (backup facility providing quick-start support)
- 300MW (3 x 100MW)
- Plant commissioned in 1992
- Shareholding of 70% with operational control by CLP

2016 data have been independently reviewed by the Hong Kong Quality Assurance Agency (HKQAA).

Notes: (1) Scope 2 emissions are included in Scope 1 as electricity consumed was generated within CLP Power Hong Kong's own organisational boundary.

⁽¹⁾ Stope 2 effissions are included in Stope 1 as electricity consumed was generated within CEP Power Hong Kong's own organisational boundary.
(2) Not applicable to Penny's Bay.
(3) The quantity of water withdrawal from freshwater resources is negligible.
(4) Wastewater is collected by licenced collector to government sewage treatment facility for treatment and no measurement data is available.
(5) Waste categorised in accordance with local regulations. Contractor waste is included. Waste arising from Penny's Bay Power Station is reported separately from Black Point Power Station (hazardous waste since 2014, and non-hazardous waste since 2013).
(6) All safety data are combined for the three power stations under Castle Peak Power Company (CAPCO).
(7) Started reporting in 2014.
